Innovation, the future!

By conceiving and drafting a project, we have succeeded in creating a **new and unique design object** with Round Fire, combining functionality and aesthetics. The main design purpose is in fact to fulfil needs, propose solutions, and explore new possibilities to improve everyone's quality of life.

“Round Fire revolutionises the concept of outdoor space, standing out for its design and functionalities.”

Structure

The modular structure enables complete personalisation based on its position, with the possibility of including one or two steps. It is available in a wide range of RAL colours and can be further enhanced with integrated lighting accessories.

Seating

EPS seating heated by three separate thermostats, one for each zone (backrest, seating, floor). Heating times: 1 to 2 hours depending on outside temperature; can be switched on remotely.

Cooking plate

Stainless steel, 15 mm thick cooking plate, with smart lock system for easy centring on the brazier; easy to clean. Wood/gas -fired alternative.

Table

Okite table with integrated LED lighting.

Round Fire is the ideal outdoor lounge for all seasons.

Round Fire is designed to add value to your garden, allowing you to enjoy it even on the coldest days of the year. Our company has thoroughly conceived, **developed and patented all the materials** and parts during the design process to provide you with the best possible comfort. We have chosen to give our lounge a round shape to make it more harmonious, **ensuring cosiness and sociability**, but above all **wellbeing** thanks to the warmth diffused throughout each seating component.

Lighting

Led lighting under the table plus 2 lamps (PINA ZAFFERANO model) included.

USB sockets

USB sockets positioned under the table for charging.

Ash drawer

Drawer under the brazier with easy access for ash and combustion residue removal.

Smokeproof glass

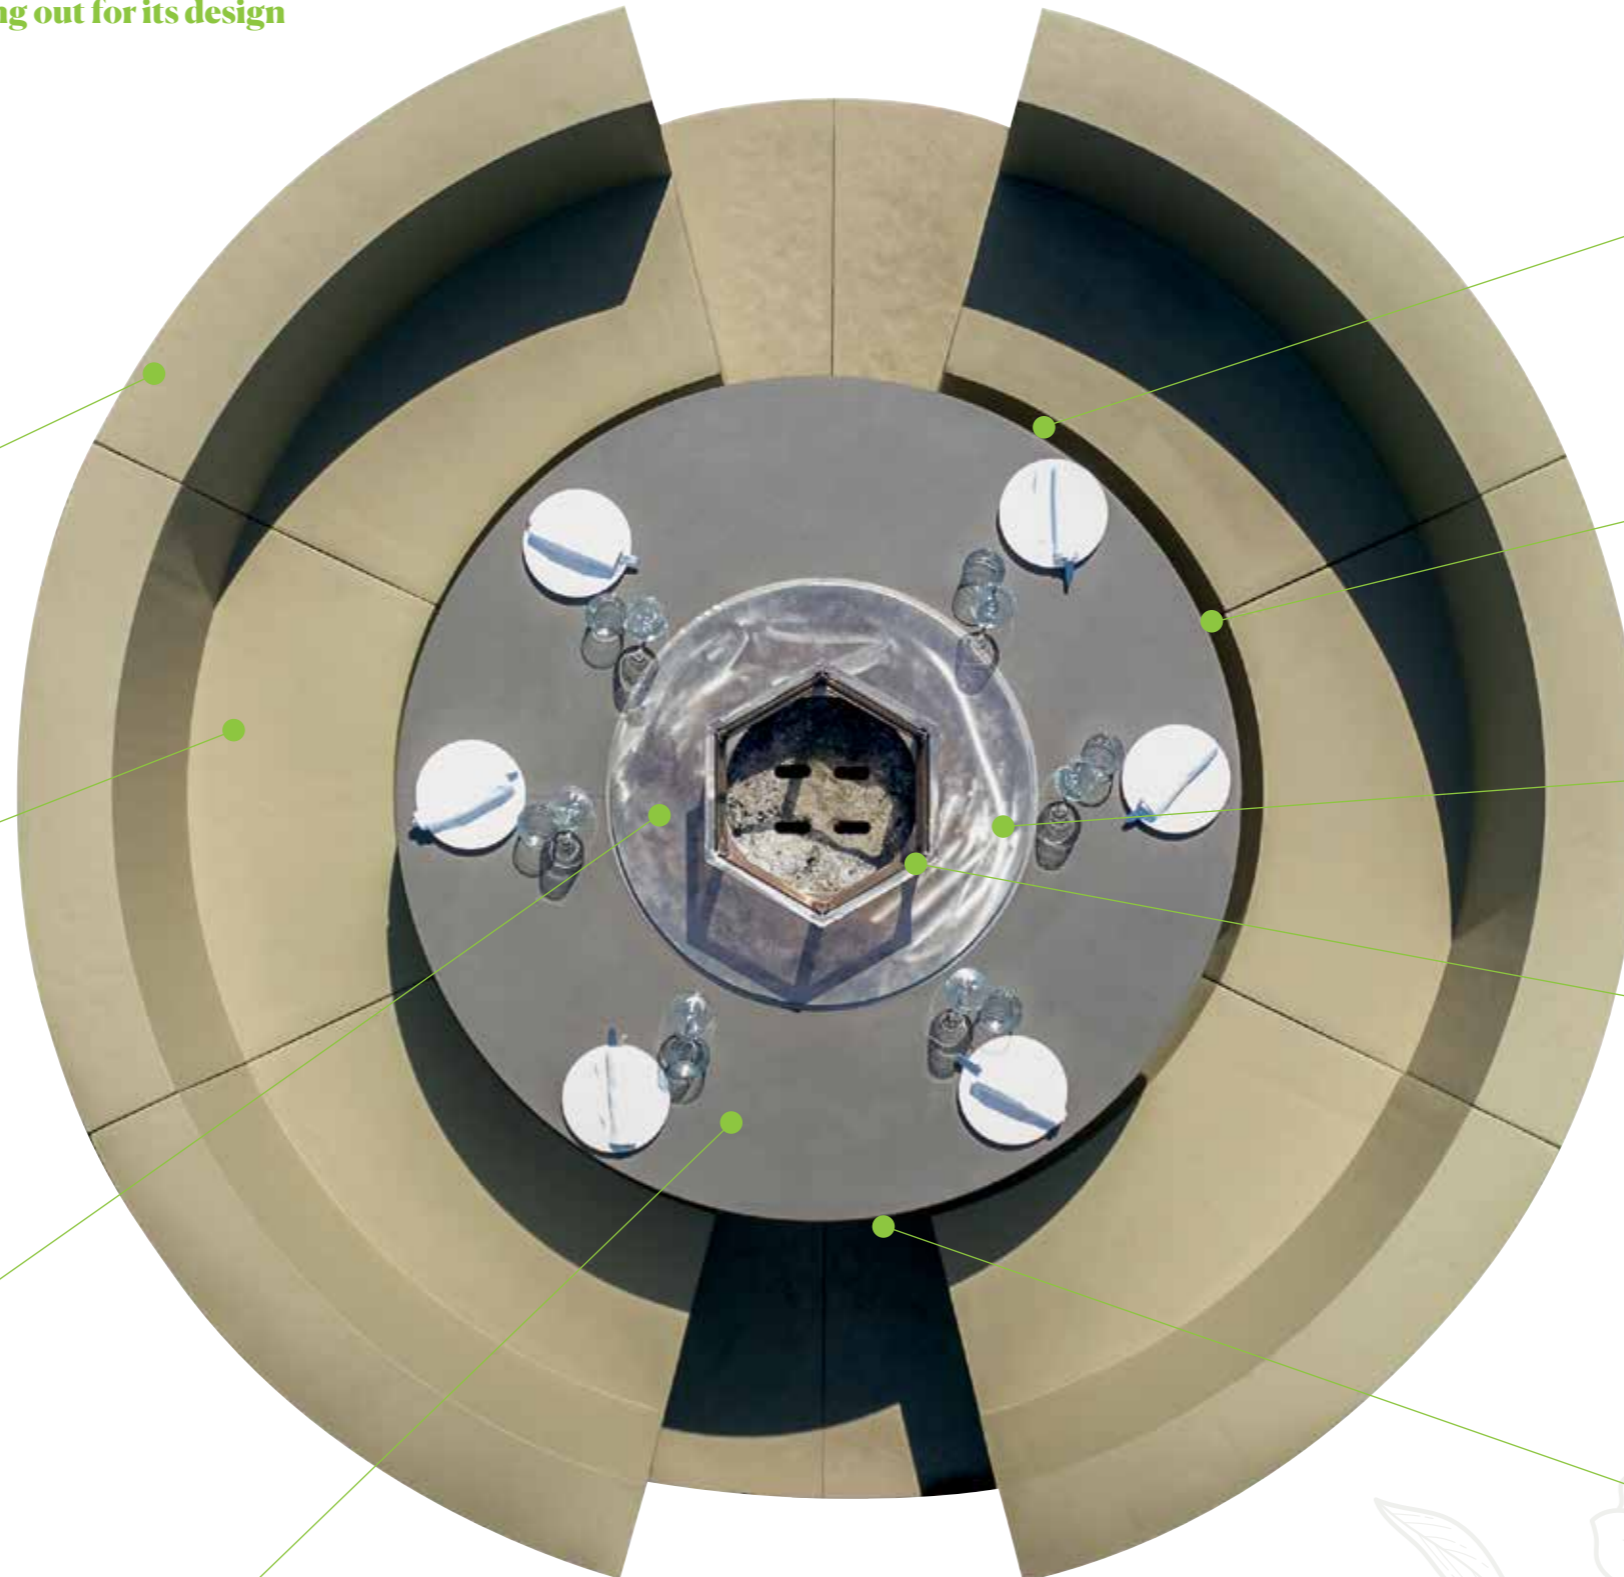

Hexagonal shaped with removable ceramic glass.

Electric system

An electric system protected by an IP66 thermosetting resin housing, designed to withstand the elements thanks to the hermetic seal. MADE IN ITALY industrial-type control components.

- Single-phase 230V power supply.
- Low voltage 24V circuits.
- Installed power: 2Kw.

When we talk about Round Fire

we talk about furniture, design and comfort;
we talk about BBQs, friends and parties;
we talk about peace, relaxation and harmony;
we talk about work, enjoyment and sharing.

We talk about many things because an object of this standard needs to be enjoyed for everything it can offer us.

Leave it to us

Don't worry about not having space, not having a suitable terrain or not having a big enough place, we can also install Round Fire on a terrace, under a porch, built into a hillside or placed in your mountain chalet or on your campsite...
wherever you want it Round Fire will come and fulfil your every wish.

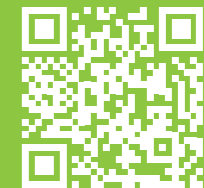

Design, warmth and outdoor cooking

Round Fire, a genuine outdoor design object, reaches a **temperature of 55°**, emanating heat from the base where your feet are, to your legs, continuing to heat the entire seat up to the backrest, with the possibility of adjusting temperatures for various parts of the body.

And let's not forget the warmth from the fire! The latter heats the surrounding air and the plate where you can cook whatever you like.

“A relaxing moment to read a book, have a coffee or sip a good whisky.”

You can see our patent on our website, follow us on Instagram or directly in our nursery!

Not just dinners: Round Fire for every occasion

With Round Fire you can enjoy breakfast outdoors: the **stainless-steel plate** is also perfect for brewing your moka pot of coffee for a special start to the day. The **integrated electrical sockets** enable you to easily connect your juicer or other electrical appliances. And if you prefer working outdoors instead of being cooped up in your office, you have all the sockets you need to charge your computer or smartphone.

Imagine working from home comfortably seated at the Round Fire, enveloped in warmth, while enjoying the fresh air and beauty of your garden, with your dog by your side. Work outdoors, without giving up the comfort of your home.

High quality
High-quality materials for an exclusive product

Design
Modular design for easy transport and assembly

Heated seating
Heated seating with low-voltage resistors

Finishes
Personalised resin finish in RAL colours

Gas or wood
Central brazier for the fire and cooking, with wood or gas-fired options

Cooking plate
Stainless-steel plate for outdoor cooking

Round Fire is designed with resin seating heated by an electric system and a central wood-fuelled fire, a stainless-steel cooking plate and a table to eat at.

Through our constant striving to improve and fulfil our customers' needs, we have also developed an alternative: a Round Fire in a **gas version instead of wood fired.**

Discover
Round Fire

The dinner you have always dreamed of

Round Fire invites you to enjoy unique experiences in the comfort of your own home: dinner under the stars, or an outdoor meal while savouring the wonderful autumn colours of nature. And why not admire a snowy panorama without worrying about the cold. With Round Fire, hosting becomes a pleasure: dinner is cooked directly by diners in a raclette style!
